

# I Do Transportation review packet.

Chase, here are the working links for the website mockup, admin preview, and proposal/questionnaire in one place. The design is a strong working mockup, not the final production site.

PREPARED FOR

**Chase**

UPDATED

**May 14, 2026**

## **Website mockup**

Stable public preview of the wedding-focused site.

**[Open website](#)**

## **Admin-connected preview**

Temporary full-stack preview for testing admin-fed content.

**[Open full-stack preview](#)**

## **Admin login**

Demo admin area for content control and visual editing. Credentials are shared separately.

**[Open admin](#)**

## Proposal and questionnaire

The deeper SANO proposal page, next-step questionnaire, and project direction.

### Open proposal

#### What this shows

A cinematic, wedding-forward redesign with a cleaner customer journey, polished fleet presentation, and a more premium first impression for I Do Transportation.

#### How the admin helps

The admin side is meant to reduce dependency on a webpage provider for every small update by giving the business a controlled way to edit content and imagery.

#### Current stage

This is roughly a 70% working mockup: strong enough to review quality and direction, but still flexible enough for Chase to steer before production.

#### Next steps

1. Confirm the direction and provide the 50% down payment.
2. Complete the questionnaire with final services, photos, pricing rules, and preferences.
3. SANO finishes the remaining build, content, integrations, QA, and launch setup.

---

Temporary preview links are for review only. The static website and proposal links are stable on GitHub Pages; the admin-connected preview is temporary and should be replaced with production hosting before launch.
